

Rotary screen wallcover printing

■ 2

In a highly competitive market such as the wallcover printing industry, it is essential to constantly distinguish yourself, add value to your products, and find new niches. Stork Prints has developed a solution that helps you outsize your competitors. Literally.

Ø screens

128 cm repeat size

Twice the repeat size, twice the design freedom, twice the business opportunity

Our new wallcover printing solution consists of machinery and screens, which enable the use of repeat sizes up to 128 centimetres. That's right, twice the conventional size. Great news for both your design department and your sales department, because new design opportunities also mean new business opportunities.

3 ::

Flatbed size at rotary speed

Can you imagine combining the design possibilities of flatbed technology with the speed and reproducibility of rotary screen technology? With our new range of wallcover printing equipment, you can. Stork Prints provides you with the printing machine, engraving equipment, screens, and anything else you need for the production of life-sized eye-catchers: from pre-press and dispensing to drying and curing. Naturally, you can also count on Stork Prints' service, support and application know-how.

Exciting new design options in repeat size 106/128

Our new wallcover printing and engraving equipment is compatible with several repeat sizes between 64 and 128 cm. The unique 128 cm repeat size not only allows you to produce the largest patterns ever, but also gives you the space to create design effects that were previously impossible, for example by engraving a 64 cm design on a 128 cm screen. The use of a 106 cm repeat size allows you to create perfectly square patterns on the full width of a standard 106 cm wallcover. What new ideas are you coming up with to turn your wallcover products into wall art products?

Stork Prints

Stork Prints is the leading provider of system and application know-how in textile and graphics printing processes as well as two-dimensional, high accuracy, metal precision products.
