*Efficient, flexible and high quality
CAD software*

Stork Prints

Do you want ...

- to easy up your daily work with new high advantaged functions for designing, separating, engraving, colouring, printing and many more?
- to have one concept from your idea over the whole production process to your bottom line?
- to achieve a high-grade quality management?
- to use one process information for the whole workflow?
- to use digital data processing from all your customers
- assists of our team including **STORK** know-how?

Find the answer in **bestIMAGE** - our innovative CAD/CAM software solution processing all your ideas!

Main Features of

LYR file 'ALL IN ONE' containing all information within one file
multi processing technology (up to 4 CPU's)
seamless, endless image visualisation & manipulation

shaded pixel and vector data within one file
Adobe Photoshop® connection from 5.0 till CS3

expertise colour management
automatic design functions
multi repeat operation

layer technique
CMYK support & calibration
Windows® based

Modules and Services

bestIMAGE offers a comprehensive range of modules and services. Herewith you can extend your possibilities with a wide range of textile specialist functions and tailor the functionality of your software package precisely to your production requirements.

With this option of open combinations of modules, functions and services, SPA provides high flexible and applicable software for improving and fastens your production.

With all these flexible modules, services and training you will be able to create and modify designs in record time.

bestIMAGE

Improvements & Highlights

...for Designers/Engravers:

- PDF Import (PDF/X-3) via file open
- combined AM (Analogue) and FM (Frequency) raster
- 'Colour Info' improvements
- user-defined cursor forms
- new filter enhance, median, noise, motion blur
- noise function in raster process

...for Colorists/Printers:

- save "colour way" in single file
- none used separation keeps colour block during printing
- colour names stored in file

Additional Service

Printer - Measuring of Printer Calibration / Connection to digital printer
CMYK - Creation of CMYK Profile including Production Calibration
Production - Production Calibration
Design Viewer
Patch Downloads
ISL - Direct connection service

With your ideas and our knowledge of many years in developing CAD/CAM software you can simplify your work by using flexible module combinations specific to your workflow. All modules are working 'hand to hand' to simplify conversation with our CAD/CAM systems, all Digital Printing Systems and to your customers.

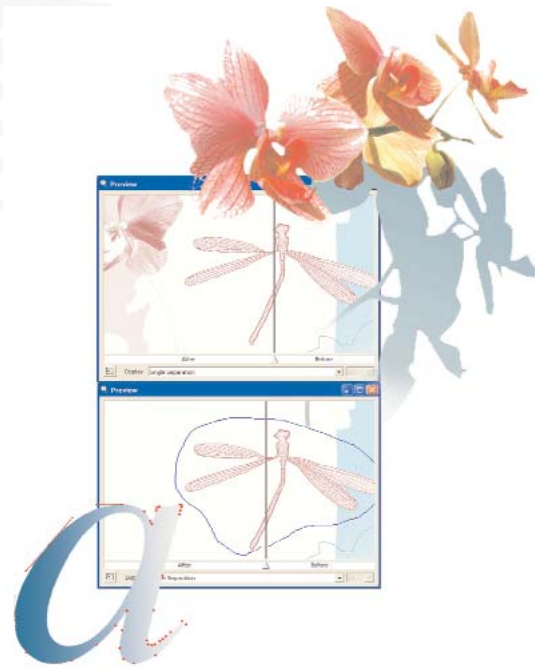

bestIMAGE Modules

Engraving

for a fast, high-quality and accurate representation of designs

- fast and multiply repeat features
- shading of vector and pixel graphic
- overlapping
- optimized creative tool box
- powerful optimized filter functions
- layer technique
- full color control
- on-line Photoshop connection
- easy drag and drop from separations and/or raster data
- separation with mask function
- complete database handling "all in one"

Using Engraving takes you a giant step forward in your daily work in a more efficient workflow, reducing time and manual labor.

Creative Coloring

quickly converts creative ideas and designs into color variations or simulated digital print samples

- textile overlay simulation
- Pantone® colors for textile and paper
- creation of own color books
- display and print of several color variations
- easy drag "n" drop of colors

To achieve a calibrated print simulation for digital sampling or production, module Simulation is needed as "add-on" module, which reduces the quantity of real strike-off prints.

For doing sales presentations module Texture Mapping can be used as "add-on" module and printing on photo quality paper for saving photo shoots.

For visualised designs on standard templates [Texture Mapping Viewer](#) can be used as "add-on" module.

CMYK

for rotary and/or flatbed textile process a CMYK separation can be done simply and fast by system standards.

To improve the quality to customer's production needs a CMYK profile can be generated referring to all production data for a calibrated high quality 4 color print.

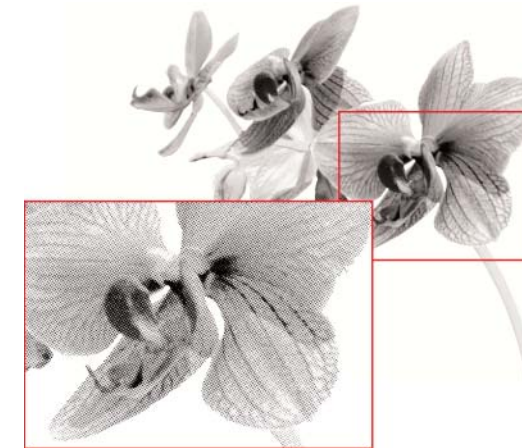

As a service - Stork Prints Austria provides a CMYK color separated file which has to be engraved and printed under customer's production conditions. Stork Prints Austria calculates this specific CMYK profile which is the platform for separating in CMYK mode under customer's production environment.

TexRip

includes a 12 bit raster-engine and can be used as an additional or common file and Stork formats are supported, such as .tiff and .bmp.

- compatible to most CAD/CAM systems
- improved circle raster
- easy to use
- optimized data preparation
- simple & quick rastering
- "dot size" mode for digitally measurements of screens
- import of most common file formats
- export of .pdf format

Network Communication (NetCom)

provides a high compression factor without any lossless of quality or information

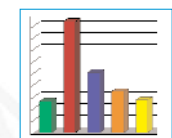

- additional text as a virtual "post-it"
- optimized file transfer via LAN, ISDN or internet

Production Data Management (PDM)

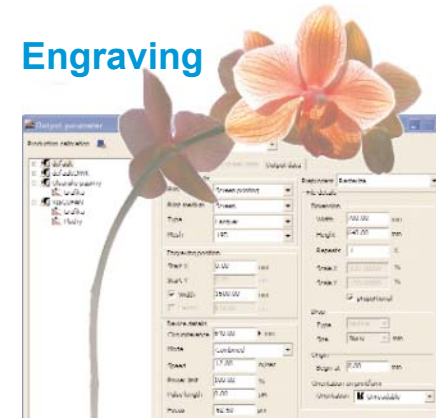

administrate activities of the CAD operations and records designs, functions, etc... within Microsoft Access™ Database.

- record activities
- specify projects
- and many more

This module is interesting especially for controlling, billing, accounting, etc...

Freeware & Downloads

bestIMAGE Viewer

Would you like to communicate very simple and without any investment with your sales persons even if they are on a business trip to finalise your new collection or any other projects?

Would you like to make an online show up of your new collection to your customers?

Best service you can give with a freeware of **bestIMAGE** Viewer for your sales/agents personal and of course for your customers, too.

ISL Connection Service

Would you like to have technical support fast and simply? Just connect all systems of STORK with broad band internet.

With our ISL direct connection service you will always be able to have a fast support for all your systems by specialist SPA technicians.

Patches

Did you know?

All patches of **bestIMAGE** software are always available on our service homepage <http://cs.storkprintsaustralia.com> and FREE for download.

How to do?

Login as "anonymous", choose directory Viewer for **bestIMAGE** freeware, ISL for download direct connection software and patches for upgrade your system.

HARDWARE AND SOFTWARE REQUIREMENTS:

Intel® PENTIUM (Extreme Edition, Dualcore, D), Intel Core™ 2 (Extreme, Quad, Duo), Intel® XEON or AMD® Phenom™ X4 Quad-Core, AMD® Athlon™ (64 FX, Dual-Core, Single-Core) are supported.
 RAM capacity: minimum 4 GB; depends on usage and used mainboard; max. >128GB (see Microsoft Vista™ operating system below)
 All 32 bit graphic adapters with minimum resolution of 1024 x 768 pixel, 80 Hz with DirectX Support.
 (Stork Prints Austria GmbH recommends the 'ATI Radeon 256 MB' graphic adapter for single and dual head operation)

Network adapter 10/100/1000 MBit. up to 4 GB RAM
 Windows Vista™ Business(or)Ultimate 32-Bit-Edition (US english)
 over 4 GB RAM (128GB and more)
 Windows Vista™ Ultimate 64-Bit-Edition (US english)
 Internet Explorer 5.0 or later for installation of on-line help and PDM

For further information of **bestIMAGE**, please contact your local representative or Stork Prints Austria directly. You can also visit our website at www.storkprintsaustralia.com

The Stork Prints Group is the leading supplier of printing consumable concepts for the textile and graphic market as well as 2-dimensional, high accuracy, metal precision products. The group achieved a turnover of € 200 million in 2007. For more information please visit www.storkprints.com.
