

Bulkfeed

Unattended digital textile production printing with Stork ink systems

Now that the modern generation of digital textile inkjet printers is becoming increasingly fast, small digital production runs are feasible for nearly everybody who wants to print textiles using digital methods.

Apart from the higher speed, this means that printing companies have new digital printing requirements to meet: the printer should print the whole roll of fabric in one run and, preferably, no operator should be needed to watch and control the process.

It has become evident over the past few years that only degassed inks can meet these new requirements. Stork Digital Imaging has therefore set up an ink factory to be able to provide degassed inks in special patented ink cartridges. A low-cost ink feeding system is required to use these cartridges, but the whole system guarantees air-free operation throughout the chain. In contrast to using local degassing units on the printer, this ink feeding system continues to offer the flexibility of digital printers, so switching inks, even from one type of ink to the other, is very fast. Hardly any ink is wasted during the switch. Furthermore, the factory-degassed inks are truly air-free and offer superior running capabilities compared to sub-optimal local degassing in the printer.

Stork Digital Imaging offers two types of bulk feed systems. The first system can be mounted onto any Mimaki JV5 printing engine (as used in La Meccanica Qualijet systems, MS printers and Aleph printers) and a special stand-alone unit is available for all printers that use the 220 ml cartridge for Mimaki and Mutoh TX type printers.

As well as buying Stork inks, you can also request a special price for this bulk feed system. This will enable you to enjoy the best inks with the best possible ink feeding system.

	Bulk feed model for JV5 systems (mounted on top)	Stand-alone for TX systems
Width (m)	1.40	1.67
Depth (m)	0.70	0.70
Height (m)	0.25	1.07
Weight (kg)	40	150
Cartridge type	2 liter Stork ink cartridge	2 liter Stork ink cartridge
Ink types	Reactive, Acid, Disperse Direct, Sublimation	Reactive, Acid, Disperse Direct, Sublimation
Scope of supply	Steel construction, valves, Tubes	Steel construction, valves, Tubes
Including ink counter reset modification kit	yes	yes
For printer types *	Mimaki JV5 Qualijet HS, HF and TP MS JP4 and JP5 Aleph txB 160s	Mimaki TX2 Mutoh Viper TX Atex DBP D-gen Heracle, Aracne, Teleios Roland FP-740 Aleph BT1820, 1825
